Top Skills

Java
JavaScript
Spring Framework

Smolin Igor

Fullstack developer (React, Spring)
Russia

Summary

Highly skilled and impact-driven Full Stack Engineer with professional experience building scalable web applications, microfrontends, and high-load systems. My core expertise spans across React, TypeScript, Java (Spring Boot .For me, software development is far more than just a job—it is a lifelong hobby and a passion. I am deeply committed to continuous professional growth, implementing innovative solutions, and writing clean, efficient code.
Key Highlights & Achievements:Full-Stack Expertise:
Proven track record of designing scalable microfrontend architectures and optimizing system performance (achieved up to 30% performance improvement).Business Impact: Successfully developed and implemented a complex back-office system for a major retail chain, delivering a 25% increase in operational efficiency.Tech Community & Tech Sharing: Actively contribute to the developer community by writing technical articles on Habr and speaking at tech meetups.Continuous Learning: Constantly sharpening my problem-solving skills on Codewars and building personal full-stack pet projects using React and Spring Boot.

Experience

bft

Full Stack Engineer
August 2024 - Present (2 years 3 months)
Russia

- Frontend development using React, TypeScript, JavaScript
- Backend development using Java (Spring Boot)
- Design and implementation of scalable microfrontend architecture
- Development of high-load web applications and dashboards
- Integration of backend services with databases (PostgreSQL)
- Performance optimization (achieved up to 30% performance improvement)
- Code reviews, refactoring, and software architecture design
- Deployment of production-ready applications

AXENIX

Frontend Developer

August 2023 - August 2024 (1 year 1 month)

Moscow, Moscow City, Russia

Developed and implemented a back-office system for a large retail chain, achieving a 25% efficiency increase.
Used a modern technology stack, including React, Redux Toolkit, Tanstack Query, TypeScript, Zod, CSS, Mantine, and Webpack.
Participated in the application architecture design, ensuring scalability and modularity.

Fortum

Senior Software Developer

November 2021 - August 2023 (1 year 10 months)

• Designed, refined, and optimized an SPA by analyzing algorithm complexity.
• Built a Webpack-based project from scratch to monitor readings from remote devices and handle data processing and display.
• Improved a key metric, delivering significant business value to the company.
• Performed debugging and code refactoring. Tech stack: React, JavaScript, TypeScript, React Testing Library, Jest, CSS/SCSS, Webpack, ESLint, PostgreSQL.

Education

MITI Advanced Training (PLC / Industrial Automation)

· (June 2022 - August 2022)

Южно-Уральский Государственный Университет (ЮУрГУ)

Магистр, Инфокоммуникационные технологии и системы связи · (September 2018 - June 2020)

Южно-Уральский Государственный Университет (ЮУрГУ)

Бакалавр, Инфокоммуникационные технологии и системы связи · (September 2014 - June 2018)
